TiViTz, a math and strategy game for students, has been named the 2017 Microsoft Public Sector Education Mobility Partner of the Year.

This spring, the TiViTz Office 365 Challenge demonstrated the combined power of the Microsoft - TiViTz partnership. During the Challenge, elementary students competed for prizes playing TiViTz online using the Office 365 Education platform.

Case studies during the Challenge demonstrated that playing TiViTz over 3 months improved math comprehension as much as 3 letter grades.

Over 41% of Office 365 Education logins occurred outside of school hours, quantifying the power of TiViTz to motivate kids beyond the classroom.

"TiViTz has shown how the combination of gamification and Microsoft-based solutions can power instructional technology in schools, and Microsoft is proud to call TiViTz a partner in our shared pursuit of improving STEM education."

-Margo Day, Vice President of U.S. Education, Microsoft
